

Precision Dispensing Support Operator

Sciension (UK) Ltd, Chichester, West Sussex, United Kingdom.

SCIENION is the leading manufacturer of ultra-precise, robust, high performance dispensing automation equipment within the life-science and diagnostic field. Our systems are used from early R&D activities to industrial high throughput manufacturing of innovative diagnostic devices and biosensors. We also offer assay development and contract manufacturing services, offering a spectrum of full solutions involving the full manufacturing process. Sciension UK is experiencing rapid growth in its demand for manufacturing invitro diagnostic tests.

We are seeking Precision Dispensing Support Operators to support our Precision Dispensing Technicians that operate highly technical dispensing systems at our facility in Chichester.

Please note that our site will be moving to Lakeside Portsmouth in the coming months.

The Role

This is both a clean room and laboratory-based position involving the receipt of goods, packaging a manufactured predefined specification, record keeping in line with the manufacturing process and undergoing our incoming quality control procedure. This role will include supporting our precision dispensing technician as they undergo the manufacturing process using our ultra-low volume dispensing systems. It will also include the operating and maintaining laboratory equipment (including centrifuges, autoclave, laminar flow etc) and general laboratory upkeep and maintenance.

This position is currently carried out 24/6 and therefore candidates will be expected to work on a shift rotation at 40 hours a week.

Key Responsibilities

- Follow specific Standard Operating Procedures to meet our ISO9000 and ISO13485 quality certification.
- Execute standard procedures, make observations, and interpret findings.
- Ensure all appropriate records are maintained and that internal records are kept updated.
- Package samples and prepare paperwork for shipping.
- Carry out quality control checks and complete documentation.
- Follow strict cleaning procedures.
- Participate in rotation shift work operating on a 24/6 basis.
- Record all data and results from manufacturing runs in specified forms with accuracy and responsibility.
